## Overall Results

### Calculating 12/12 Aggregate Scores

To be eligible for the competition, a car/driver combination must enter and score a result in two disciplines of the three available. Each of the three available competitions will receive awards as appropriate and as explained in the regulations for each event. Other than Class divisions in each competition, no weighting will be applied to take account of performance variations - this is because:

- Sprint times will be comparatively close (i.e. no competitor is likely to score less than 50% - a score that would represent a time exactly twice that of the fastest in class).
- Concourse scores are 80% objective against a fixed marking guide with just 20% available as a subjective score subjective so, again, it is unlikely that any competitor will score less than 50% in total.
- Driving Test scores historically at this event have rarely been below 50% of the Best in Class. More than half score 75% or more.

Therefore, in each competition, we can expect the scores for each competitor in each class in each discipline to be between 100% and 75%. Scores from each discipline are carried forward to a separate 12/12 scoreboard as a percentage score within their competition class whereby the best performance in each class in each event will score 100% and all other scores will be diminished on a simple percentage basis. Each qualifying competitor has two percentage scores taken forward into the Overall 12/12 Competition, i.e. a maximum total of 200. Ranking is now no longer in class such that 12/12 awards will be presented against the overall score achieved in the two disciplines attempted.
