Competitors wishing to use their own transponder should declare its number on both the entry form and during signing-on for each meeting. Failing to record a suitable practice time through non-fitment, or fitting the wrong transponder, will result in the competitor starting from the back of the grid. Failure to carry the correct Transponder can result in your laps and finishing position not counting towards the results.

There will be separate practice sessions of at least 10 minutes as detailed in the instructions to competitors. Drivers must complete at least 3 practice laps to qualify for a place on the grid. Drivers practising out of session, or who qualify only through familiarity with the circuit may be placed on the back of the grid in accordance with Q12.4.2

Starting positions for scratch races will be determined by practice times. Drivers will have one practice session in each car entered at the meeting.

Cars stopping on the grid in the wrong location may be given a Jump Start penalty Q12.13 – Q12.14.

The Start Procedure for Scratch Races will be as follows unless otherwise advised in the SR's or Competitors' Instructions. As soon as all the cars are positioned on the grid the five second board will be shown and the race will start with red lights being extinguished.

MOTORSPORT UK Regulation G6.7.1 is modified as follows - Handicaps will be based on the previous known performance of the car entered, or performance of a similar car in the absence of records relating to the car entered. Any handicap may be revised during the meeting, such re-handicap being notified on the Official notice board. Handicap race grids may be as set or may be modified after practice times are studied. Organisers may run handicap races as either staggered start or using a credit lap method should staggered starts not be possible. In the event of a race stoppage during a handicap race organisers may restart the race from the original published grid positions (Q12.15).
