Curborough Speed Trials Carbon Emissions

There is no hiding from climate change.

We believe there are ways to run vintage cars so that they can make a genuinely positive, perhaps even regenerative contribution towards the UK achieving net zero by 2050.

All the emissions from cars competing at VSCC events are not just 100% recovered, but almost 400% recovered! You can make a difference too. Visit www.trees.fbhvc.co.uk to play your part.

**We recover more carbon
than our cars emit. Do you?**
